Dairy-Herd-Improvement Letter

ARS-44-1
(Vol. 33, No. 8)

August 1957

DHIA COWS PRODUCE AT ALL-TIME HIGH AVERAGE PRODUCTION LEVEL

DHIA cows have again established an all-time high average milk production record. In 1956, DHIA cows on the average produced 9,712 pounds of milk and 383 pounds of butterfat.

This new high record again emphasizes the fact that DHIA members are using their DHIA records to guide them in their culling, feeding, selection, and herd management practices to improve their dairy herds.

The following table shows the average production of cows in the Standard Dairy Herd Improvement Associations for various years since 1906:

Year	Cows on test	Average production	
		Milk	Butterfat
	(Number)	(Pounds)	(Pounds)
1906	239	5,300	215
1910	<u>1/</u> 25,000	<u>1/</u> 5,730	<u>1/</u> 227
1920	203,472	6,175	247
1930	507,549	7,642	303
1940	676,141	8,133	331
1950	1,088,872	9,172	370
1955	1,333,866	9,502	375
1956	1,406,306	9,713	383

1/ Estimated

Any dairyman can improve his herd regardless of its size or level of production if he keeps records on his cows and herd to guide him in his culling, feeding, selection, and herd management practices.

Nine out of ten dairymen in the United States are not keeping records on their cows and herds. The National Cooperative Dairy Herd Improvement Program offers to dairymen three recordkeeping plans. These plans are the Standard DHIA, the Owner-Sampler, and the Weigh-A-Day-A-Month. One of these plans will suit the needs of any dairyman in the country and every dairyman not now keeping records on his cows and herd should be urged to enroll his herd in one of these recordkeeping plans.

SUMMARY OF THE 1955-56 DAIRY-HERD-IMPROVEMENT-ASSOCIATION RECORDS, BY STATES

DHIA PROVED-SIRE RECORDS TABULATED IN JULY 1957

Following is a list of 517 sires whose records were tabulated or retabulated by the Dairy Husbandry Research Branch in July 1957. Production records used in proving DHIA sires consist of 305-day lactation records standardized to a mature equivalent twice-a-day milking basis.

An asterisk at the end of a sire's registration number indicates a retabulated record. The asterisk may be followed by any number from 1 through 15 (i. e., *12) to indicate in which of the 15 printed lists his previous record appeared. Or the asterisk may be followed by the month and year (i. e., *May 51) of the DHIA letter in which his previous record appeared. Two asterisks following the sire's registration number, or following reference to a previous listing, indicate that the proved-sire tabulation or retabulation was requested by one of the States.

In case records from more than one herd were used, the reference is to the herd from which production records for the largest number of the sire's youngest daughters were reported. If the sire has been used in an artificial-breeding association, the name of the association is given.

Proved-sire records consisting of fewer than 10 comparisons are indicated as "preliminary proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

Proved-sire records consisting of fewer than 25 comparisons with daughters resulting from artificial breeding are indicated as "preliminary AB proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

To make the most intelligent selection of a sire, the dairyman should use these proved-sire records to single out the most promising sire and then make every effort to supplement these data with additional information gathered from the herds in which the dams and daughters made their records. Particular attention should be given to the feeding practices and environmental conditions under which the records were made, in order to be assured that the records of the daughters were not made under more favorable conditions than those of the dams or vice versa. It is especially important to determine that there has been no selection of daughters in making the comparison.
